

Musway MW622

Small and cheap - with these attributes, Musway's smallest woofer is the favorite of bass fans. We have a very nicely solidly manufactured woofer with a metal basket in front of us.

The thick paper cone with a steep cone angle is very stable and is surrounded by a foam bead. The metallically painted basket and the chrome-plated (and planned) pole plates ensure an elegant look.

The ventilation is exemplary, with rear ventilation openings for centering, a large pole core bore and a ring of holes for the space under the coil. This measures 38 millimeters in diameter and has two taps of 2 ohms each. You can operate the MW622 in a closed housing, deeper

The Musway MW622 has become a small but serious subwoofer. Its drive is not only beautifully made, but also a subwoofer

worthy

but it works in the reflex housing, which is very compact for us at 13.5 liters.

Sound

In the listening test, the Musway actually does everything right. It plays deep enough for normal musical tastes and delivers precise bass. With fast techno beats, he doesn't lose his step and punches his notes cleanly. In addition, it achieves a veritable level, even if natural

according to the hut is not yet shaking. But fun is always guaranteed with the Musway. In addition, it manages with comparatively little power. One or two MW622 are therefore also very good with small power amps.
